

I am an over the road driver who enjoys access to instant traffic and weather on XM, It has saved me countless hours of delay and headache sitting in congestion. This group who wants to stop XM from having traffic & weather Reports may as well have the government take away all our freedoms, We as subscribers to satellite radio enjoy this freedom to listen to what we want when we want, A little competition never hurt anyone so these folks should just lighten up. In light of the recent events that have taken place on local and national radio stations with all the shock jock fines all I can say is great, These Shock Jocks are why people such as myself have moved to satellite radio this should be our right as Americans, If local stations can't find decent help why is this our fault? I pay my 9.99 per month and am happy to do so, those who want to take our rights and privileges away should consider living in a third world country! Thank You please listen to us out here on THE XM NATION
